

Conflict Minerals Policy Statement

RAFI GmbH & Co. KG as a supplier and manufacturer of HMI (Human-Machine-Interface) devices and components is aware of its due diligence and obligations concerning the regulations regarding "Conflict Minerals", in particular with respect to the Dodd-Frank Wall Street Reform and Consumer Act, Sec. 1502.

As part of our company policy, we condemn activities in the context of illegal exploitation of minerals, which directly or indirectly benefit armed groups in conflict areas, for instance the Democratic Republic of Congo (DRC) or adjoining countries.

Our manufactured devices may contain minerals of the so-called 3TG-group (tungsten, tin, tantalum and gold), e.g. for electrical contacts in particular tin and gold. RAFI GmbH & Co. KG. does not source these materials directly from smelters.

To ensure that our raw material is sourced with respect to ethically accepted human right values we do yearly surveys with our supply chain responsible for 3TG-material.

Therefore, to our best knowledge, we can confirm that RAFI GmbH & Co. KG and its supply chain do not use any "Conflict Minerals".
